$ npm install chalk

added 1 package, and audited 2 packages in 679ms

1 package is looking for funding
  run `npm fund` for details
```

The screenshot shows the VS Code editor with two tabs: 'package.json' and 'index.js'. The 'index.js' tab is active, displaying a JavaScript file with five lines of code that use the 'chalk' library to format console log messages. The code is as follows:

```
1 import chalk from 'chalk';
2 console.log(chalk.blue("Texto azul"));
3 console.log(chalk.green("Texto verde"));
4 console.log(chalk.red.bold("Texto rojo y en negrita"));
5
```

Below the editor, the 'TERMINAL' tab is active, showing the command prompt output of running 'node .\index.js'. The output displays the text from the console.log statements, with the first two lines being blue and green, and the third line being red and bold. The command prompt shows the current directory as 'C:\Users\daw2\Documents\DecrolyWorkspace\DAW2\DWES\UD7\HolaMundoNode'.

```
PS C:\Users\daw2\Documents\DecrolyWorkspace\DAW2\DWES\UD7\HolaMundoNode> node .\index.js
Hola Mundo desde Node.js
PS C:\Users\daw2\Documents\DecrolyWorkspace\DAW2\DWES\UD7\HolaMundoNode> node .\index.js
Texto azul
Texto verde
Texto rojo y en negrita
PS C:\Users\daw2\Documents\DecrolyWorkspace\DAW2\DWES\UD7\HolaMundoNode>
```

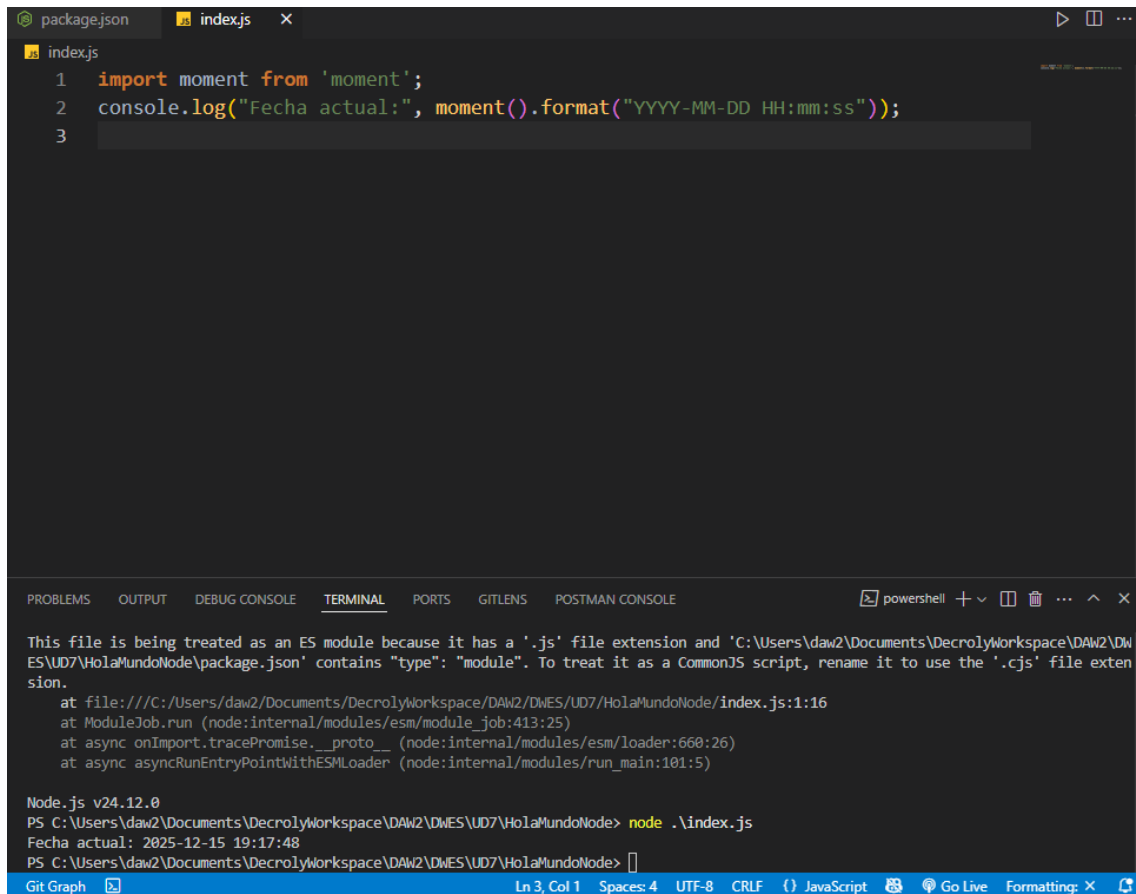

```

$ npm install moment

added 1 package, and audited 3 packages in 2s

1 package is looking for funding
  run `npm fund` for details

found 0 vulnerabilities

daw2@COMPUS040 MINGW64 ~/Documents/DecrolyWorkspace/DAW2/DWES/UD7/HolaMundoNode (main)
$ █
```

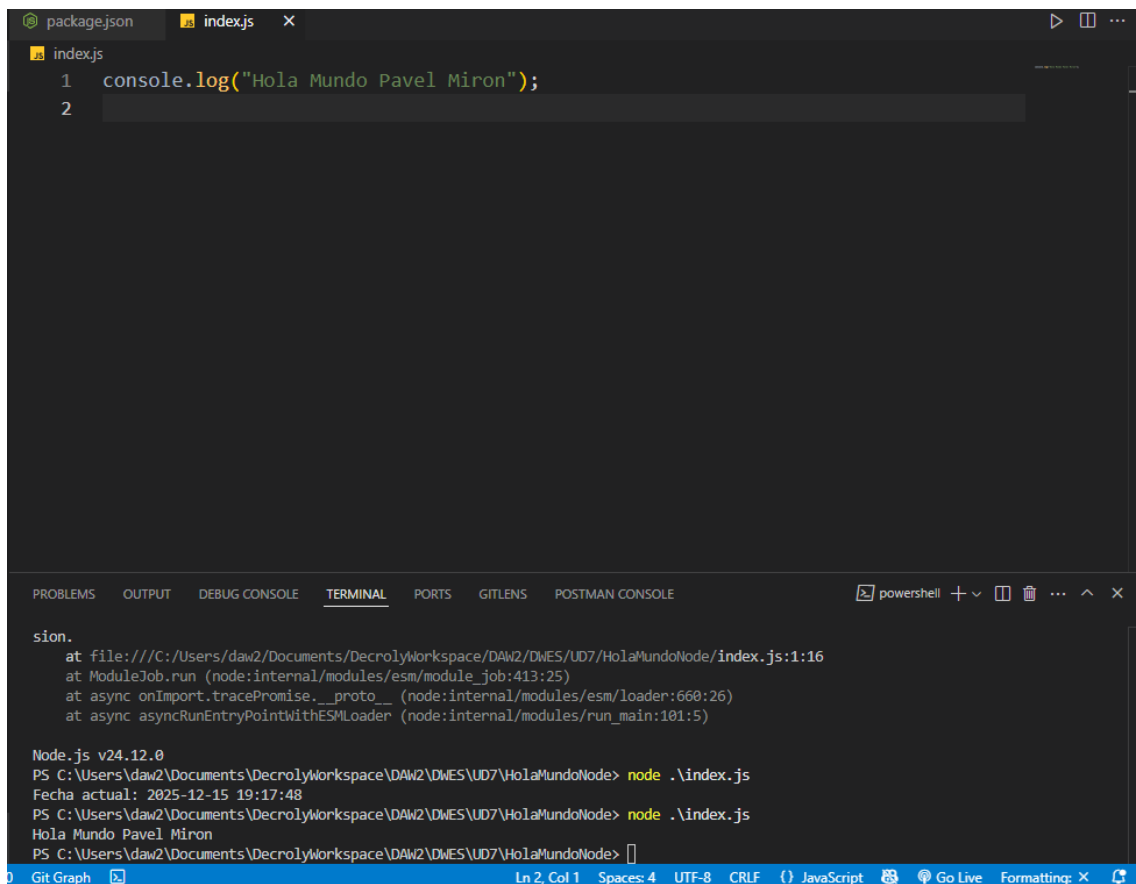

The screenshot shows a VS Code editor with a file named `index.js` open. The code in the file is:

```
1 import moment from 'moment';
2 console.log("Fecha actual:", moment().format("YYYY-MM-DD HH:mm:ss"));
3
```

The terminal at the bottom shows the following output:

```
PS C:\Users\daw2\Documents\DecrolyWorkspace\DAW2\DMES\UD7\HolaMundoNode> node .\index.js
This file is being treated as an ES module because it has a '.js' file extension and 'C:\Users\daw2\Documents\DecrolyWorkspace\DAW2\DMES\UD7\HolaMundoNode\package.json' contains "type": "module". To treat it as a CommonJS script, rename it to use the '.cjs' file extension.
