Capturas de pantalla y explicaciones sobre las conclusiones alcanzadas

Tenemos que crear dos carpetas dentro de "C:\xampp\htdocs" una carpeta ligera y otra pesado, dentro de cada meter el html correspondiente. Ligero solo tiene un (h1) y el Pesado como 20 imágenes y un poco de css.

No olvidar borrar las líneas de la actividad anterior lo de virtual host de la configuración si no encuentra las páginas.

Dentro de la ruta “C:\xampp\apache\bin” y ejecutamos el cmd desde el campo de la ruta de arriba.

Ahora hacemos las peticiones de comprobación para ver cuánto tarda cada página.

1.500 peticiones y 10 solicitudes múltiples

Ligero

```
C:\xampp\apache\bin>ab -n 1500 -c 10 http://localhost/ligero/
This is ApacheBench, Version 2.3 <$Revision: 1903618 $>

Benchmarking localhost (be patient)
Completed 150 requests
Completed 300 requests
Completed 450 requests
Completed 600 requests
Completed 750 requests
Completed 900 requests
Completed 1050 requests
Completed 1200 requests
Completed 1350 requests
Completed 1500 requests
Finished 1500 requests

Server Software:      Apache/2.4.58
Server Hostname:      localhost
Server Port:          80

Document Path:        /ligero/
Document Length:       19 bytes

Concurrency Level:     10
Time taken for tests:   1.176 seconds
Complete requests:     1500
Failed requests:        0
Total transferred:     433500 bytes
HTML transferred:      28500 bytes
Requests per second:    1275.44 [#/sec] (mean)
Time per request:      7.840 [ms] (mean)
Time per request:      0.784 [ms] (mean, across all concurrent requests)
```

Pesado

```
C:\xampp\apache\bin>ab -n 1500 -c 10 http://localhost/pesado/
This is ApacheBench, Version 2.3 <$Revision: 1903618 $>

Investiga

¿Cuál fue la parte más complicada de esta actividad? ¿Cómo lograste resolverlo?

No encontré complicaciones en esta actividad.

¿Has identificado alguna diferencia en el rendimiento entre alojar tus imágenes en tu equipo y acceder a imágenes alojadas en Internet? Por favor, explícalo.

Si, porque cuando sea en local se pueden traer muy fácil para enseñarlas con html y no se necesita internet, pero con imágenes traídas por url desde internet, pueden tardar un poco más porque depende de la velocidad de conexión y de los servidores donde están alojadas.
