Writting

Hello Charlie. Thanks for texting me. I started my new job this week as a web developer. I work in small tech company with friendly and young team of my years. The office is modern and bright. I meet my supervisor, Alex and my teammate Paul. They are good persons and helped my to get comfortable and show me a office.

First at all, we had a short meeting on the morning to talk about porjects. After this, I created a simple web page using HTML and CSS, to show my skills. Also I learn who in company works using GitHub for codes of different teammates. Many thinks are new for me but interesting.

At the end of the day, I felt a litte tierd but positive. I was nervous on start of the day, but now I feel more confident. I think i will lean many new things on this job.
